

PCL Construction and Boreal Bioenergy are proud to announce our new partnership!

Boreal Bioenergy is a Canadian based biofuel innovator that provides renewable and sustainable forestry-based energy solutions. Boreal will utilize the proven FlashTor™ technology for their torrefied wood pellet facilities that transforms otherwise non-usable forestry waste into torrefied black pellets, creating a new highly-efficient fuel that can be used as a clean energy coal replacement product.

PCL is supporting Boreal with front end project development, constructability input and will be the general contractor of the first Obed facility site, with additional facilities to follow. Learn more about Boreal at [www.borealbioenergy.com](http://www.borealbioenergy.com).

**About PCL Construction**

PCL is a group of independent construction companies that carries out work across Canada, the United States, the Caribbean, and in Australia. These diverse operations in the civil infrastructure, heavy industrial, and buildings markets are supported by a strategic presence in 31 major centers. Together, these companies have an annual construction volume of \$8 billion, making PCL the largest contracting organization in Canada and one of the largest in North America. Watch us build at [PCL.com](http://PCL.com).
